

BECOME A PEST MANAGEMENT PROFESSIONAL

The Kansas Department of Agriculture is the regulatory agency that oversees the administration and licensing of pest management applicators and businesses.

You can find the Pesticide and Fertilizer Division online at <https://agriculture.ks.gov/divisions-programs/pesticide-fertilizer>

If you are interested in becoming a licensed pest control professional, then you must take several steps, including testing and paying licensing fees. You can also work as a registered technician for a licensed pest control company before you test for your applicator license.

You can the information you need at <https://agriculture.ks.gov/divisions-programs/pesticide-fertilizer/pesticide-applicator>

If you have questions or would like assistance in this process, you can contact the Kansas Pest Control Association offices at 785-271-9220 or kansaspest@yahoo.com
